

Для настройки PPPoE выбираем вкладку Home, слева прямоугольник WAN.

Используем PPPoE подключение.

Вводил логин и пароль/подтверждение пароля

Connect mode select обязательно выбираем Always-on.

Apply

The screenshot shows the configuration interface for a D-Link AirPlus G High-Speed 2.4GHz Wireless VPN Router. The 'WAN' tab is selected in the left sidebar. The 'WAN Settings' section is active, and the 'PPPoE' option is selected. The 'Dynamic PPPoE' option is chosen under 'PPP over Ethernet'. The 'User Name', 'Password', and 'Retype Password' fields are highlighted with a red box. The 'MTU' field is set to 1492, and the 'Connect mode select' is set to 'Always-on'. The 'Apply' button is highlighted with a red box.

WAN Settings
Please select the appropriate option to connect to your ISP.

- Dynamic IP Address Choose this option to obtain an IP address automatically from your ISP. (For most Cable modem users)
- Static IP Address Choose this option to set static IP information provided to you by your ISP.
- PPPoE** Choose this option if your ISP uses PPPoE. (For most DSL users)
- Dial-up Network To surf the internet via PSTN/ISDN.
- Others WAN Type for PPTP, L2TP and BigPond Cable connect to ISP.
